

LIMINGXI Weekly Report for 2024/11/25--2024/11/29

Planned

1. Perform fine regional compensation on the sand table map.
2. Test the display effect of npc_car.

Plan Completion Progress (Working)

1. Debugging the algorithm for fine regional compensation on the sand table map.

Finished

1. Wrote and tested the navigation effect of the small car in the scene including npc_car controlled by the traffic_manager.
2. Wrote and tested the navigation effect of the small car in the scene including npc_car controlled by the keyboard.

Unexpected Events

1. The tracker may have wear and tear, resulting in issues like failure to start up or hardware-induced positioning drift.

Next Work Plan

1. Write code to enable the small car to automatically track along the spawn point.
2. Implement control of npc_car in Carla with a game controller.
3. Shoot video of the sand table car following and avoiding traffic in the Carla environment.
4. Continue debugging the regional location compensation algorithm.
